Internet Telephony Services Providers' Association *The Voice of Advanced Communications*

2015 ITSPA Awards Winners Announced

19th March 2015 – The winners of the 7th annual ITSPA Awards have been announced today. The ITSPA Awards, sponsored by Magrathea, are designed to celebrate innovation and best practice within the sector. The reception took place at the Tate Modern and the awards were presented in nine categories that represent the range and scope of the VoIP and Unified Communications industry in Britain. The winners and finalists are listed below.

Award Winners:

Best Consumer VoIP: **Orbtalk** Best Business ITSP (Small Enterprise): **Hello Telecom** Best Business ITSP (Medium Enterprise): **Soho66** Best Business ITSP (Corporate): **TalkTalk Business** Best VoIP CPE: **BT Business HUB 5** Best VoIP Infrastructure: **GENBAND Nuvia** Best VoIP Innovation: **Antheus Milan Contact centre system** ITSPA Members' Pick:

Highly Commended:

Best Consumer VoIP: **Vonage** Best Business ITSP (Small Enterprise): **Telappliant** Best Business ITSP (Medium Enterprise): **Node4** Best VoIP Infrastructure: **ipcortex - VoIPCortex** Best VoIP Innovation: **Aeriandi – DTMF Payment Solution**

Entrants to all categories had to complete a written self-assessment, which were independently reviewed by the ITSPA Awards judges. In addition, Malden Electronics conducted the technical testing for three award categories: Best Consumer VoIP; Best Business ITSP (Small Enterprise); and Best Business ITSP (Medium Enterprise). Entrants in these categories underwent two months of technical testing as well as submitting written

entries. Separately, The ITSPA Members' Pick was a selected from a shortlist of suggestions from membership, who they believed had provided real value or support to the industry. This was voted on at event today by the membership. The ITSPA Champion Award was chosen by the ITSPA Council for specific work of merit.

Eli Katz, ITSPA Chairman, said, "Congratulations to all the winners and to those companies highly commended. This has been another competitive set of awards reflective of a continuing growth and diversity of our industry. The market is maturing and developing at pace, with 2015 looking to be another promising year full of exciting new services. There are a number of interesting developments coming up including the General Election, the final stages of the European Single Telecoms Package and an Ofcom review of the Digital Communications Market. We'll monitor these developments closely and will continue to ensure our voice is heard in areas of importance to the industry. There are a number of interesting work streams that ITSPA is focussing on this year and we welcome all companies who haven't yet joined to bring their expertise to the table."

Magrathea's Technical Director Linus Surguy said, "Magrathea is delighted to continue its support of the ITSPA Awards. It is great to see the continued number of entries from new and old faces, outlining how much our industry has developed over the years."

The 2015 ITSPA Awards were open to all those in the VoIP and unified communications space, including those who were not members of ITSPA. For more information on ITSPA or the awards please go to <u>www.itspaawards.org.uk</u> or <u>www.itspa.org.uk</u>

- **Philip Davies MP** For his support in tackling anti-competitive blocking of VoIP services by certain mobile oproviders
- Jon Beardmore (BT) For leading ITSPA's extensive Open Internet activity over the past three years, with positive outcomes for the industry

-ends-

Note to editors:

About ITSPA (<u>www.itspa.org.uk</u>)

ITSPA is the UK's industry body for Internet Telephony Service Providers. Founded in 2004, with over 60 members, ranging from the largest Tier one operators to the new entrants, providing services to millions of consumers and businesses.

About VoIP

Internet Telephony is the ability to make voice calls over any Internet Protocol (IP) connection, particularly broadband, using Voice over Internet Protocol (VoIP). IP Communications also enable a rich multi-media set of advanced services, including Video, High Definition Sound, Instant Messaging and Presence. Internet Telephony Service Providers can provide regular and enhanced phone line services – often at substantial cost reductions.

The ITSPA Awards are sponsored by Magrathea:

About Magrathea: (<u>http://www.magrathea-telecom.co.uk/</u>)

Magrathea is the UK's premier supplier of carrier services and managed solutions in all areas of computers and communications. First established in 1995 we have seen the industry grow and change. Our experience is a key part of the service that we deliver to you and your customers.

Our network spans both the PSTN and IP World, with multiple connections to multiple top tier TDM carriers, including a full BT & Eircom interconnect allowing us to fully integrate with the SS#7 network in both the UK and Ireland. Our IP network is diverse with multiple Tier-1 transit suppliers as well as peering at Linx supplemented by private peering with key IP providers. The network is fully NGN enabled allowing us to fully support Voice over IP interconnection and services.

Our technology is entirely developed in house but draws upon industry standards and utilises industrial strength components for ultimate carrier grade reliability.

Our switching facilities, based within Telehouse London, Bristol and Dublin give us access to virtually unlimited capacity and bandwidth and access to the best carrier networks in the world.

Magrathea are a leading wholesale VoIP provider in the UK, supporting both SIP and IAX. Our solutions include;

- Managed National and International Voice Connectivity, combining competitive rates with high call quality
- Providing UK and Ireland geographic and non-geographic numbering
- Hosted Billing Solutions
- Number Hosting
- Number Portability
- Providing 999 emergency service calling solutions

About Malden Electronics (www.malden.co.uk)

What do integrated circuit designers, network equipment developers, terminal makers, network operators and large enterprises have in common?

Many of these companies rely on speech quality test systems developed by Malden to evaluate and refine the performance of their products and services.

Malden's products make real telephone calls using real speech signals. They measure the performance of the network from the perspective of the user, taking into account the

parameters which are important to *user satisfaction*. When did you last hear a telephone user complain that "jitter is bad today"?

Malden's approach to business is personal, too. The requirements of an operator are very different to those of an integrated circuit maker, even though "speech quality" features in both. We meet our future customers in person, taking time to understand their concerns. We encourage no-obligation evaluation loans, allowing the benefits of our test systems to speak for themselves. Best of all, we do not forget our customers after they buy a test system - we continue to welcome their questions, requests for assistance and ideas for new product features. Whilst we boast many years of engineering excellence in the speech performance field, we are also proud that some of the best features in our products were inspired by our customers.

Troubleshooting, checking out the competition, long-term monitoring of performance, network optimisation - these are some of the ways Malden's test systems bring real value. After all, what is the cost of inferior speech quality?
